Zoning Commission 2nd Wednesday of the Month at 6:00 PM

Zoning Board of Appeals 1st Monday of the Month at 5:00 PM

2016 Summary

Sylvania Township departments have been moving smoothly into the new year, but it's not too late to take a look back at some of the accomplishments of those departments in 2016. Many of the items didn't gain headlines when they occurred, but are examples of work which continues to go on behind the scenes to provide services as efficiently as possible for the residents and businesses in the township. Sylvania Township (approximately 28,000 population) is the second largest jurisdiction in Lucas County, Ohio. It is a simple form of Government with 3 elected Trustees and an elected Fiscal Officer. Other taxing authorities in Sylvania Township are the City of Sylvania, Sylvania Schools, the Sylvania Area Joint Recreation District (SAJRD) and the Olander Park System (TOPS).

Annual expenses for safety services were about \$16 million per year which is just over 75% of annual Township expenditures. The Police Department serves the unincorporated area of Sylvania Township (28,000 people) and the Township Fire Department serves both the Township and the City of Sylvania with 4 stations and a total population of about 50,000. Township safety forces take pride in providing professional compassionate and effective Police, Fire and Emergency services.

The Township is also responsible for maintaining approximately 131 miles of roads, infrastructure and other maintenance services including snow and ice control and road signage. With the addition of road services provided to residents living on State and County roads the total mileage is about 170 miles and is approximately 13% of annual Township expenditures. Other responsibilities for the Road and Service Department are maintaining all Township buildings and grounds, including Association Cemetery. Along with inspecting, maintaining and repairing all Township equipment from large fire rigs to chain saws.

The Township Administration includes finance, human resources, planning & zoning and information technology for the unincorporated area of the Township.

As the year goes on, remember that anyone interested is always welcome at public board meetings and you can also stay up to date by visiting the township website at www.sylvaniatownship.com.

For questions or further information, please contact Mike Jones, Public Information Officer at (419) 882-0031.

Administration

The Administrative staff oversees all Township operations at the direction of the Board of Trustees and the Fiscal Officer. The Public Information Officer is a contract position and reports to the Township Administrator and assists all departments with public information including the Township Alert System.

Sylvania Township participates in numerous community and regional organizations and agencies during the year. As well as make numerous appointments in addition to the Township Zoning Board and Township Zoning Board of Appeals. In 2016, these groups totaled about 21.

Finance Department

Keeping an eye on income and paying the bills seems routine, but making sure the two are always in balance is the continual goal. The success of that effort for the township is clear at the end of each year, and this past year, as has become usual, the results show a close eye on expenses has kept departments below budgeted amounts. There is little that can be done to affect revenue budgets as they are pretty much limited by the yield of property tax levies, but expenses are controlled by township employees and managers.

Expenses of the general fund were about 82 percent of the amount budgeted. The road and bridge fund spent approximately 77 percent of its budget while the police department spent about 91 percent and the fire department expenses were at approximately 90 percent.

In 2016, the finance department refinanced bonds issued for fire station construction. Through that process the township was reassured about its financial stability and the refinancing resulted in a savings of \$511,000 by the maturity of the bonds in 2030.

Human Resources

In the fall of 2016, negotiations began with the bargaining units for Police, Fire and Road Departments which are continuing into early 2017. Experienced personnel is one of the Township's biggest assets. Every effort is made to reorganize and improve operations to keep total employment levels as low as possible. The following activities occurred during 2016.

	<u>Replacements</u>	<u>New</u>	<u>Promotions</u>
Administration	2 P.T.	1 P.T.	-
Road & Service Department	-	-	-
Police Department	Dispatcher	-	1
Fire Department	3	6 P.T.	-

There were 4 retirements representing a combined 66 years of service. 15 employees were presented service awards and recognized for a combined 305 years of service in 2016.

The Township received almost \$40,000 in discounts and rebates for actively participating in various BWC programs.

In its 3rd year of existence, the number of participants enrolling in the Township's High Deductible Plan continues to grow. This type of plan, accompanied by a Health Savings account, is designed to control costs for both the employee and employer.

Susan Wood, Assistant Administrator/HR Director has announced her retirement in June 2017 after 14 years of service to Township residents.

Information Technology

The Sylvania Township Information Technology division consists of one full-time Administrative Assistant/IT Coordinator. The IT Coordinator is responsible to providing IT support to end users, orchestrate and implement projects, provide phone support and maintain the Township website for all Township departments.

In 2016 the main focus was bringing township's IT infrastructure up to speed with current technology. The new website went into development in 2016 and was put into service in early 2017. The change allows website maintenance to be done completely in house, eliminating the need of a third party.

DMC Technology Group came onboard in the middle of 2016 providing managed services for all departments. The consultant switched Admin, Fiscal, Road, Police and Zoning from Microsoft Exchange Server to the Office365 email platform.

Planning & Zoning Department

A good place to get a snapshot of the local economy is the Planning & Zoning Department. By the activity here, local investment is looking much better. Zoning permits for the construction of single-family homes saw an increase over the previous year for the fifth consecutive year with 100 permits issued, the most since 2006, when 134 single family dwelling permits were issued. A total of 449 zoning permits overall were issued in 2016. The Zoning Department serves as staff support for both the Township's Board of Zoning Appeals (BZA) and the Zoning Commission.

RESIDENTIAL: Additional residential development was seen in the ongoing construction of the *Carlisle Commons* apartments on Central Avenue just west of Centennial Road. These ranch-style apartments by *Redwood Living* feature attached garages and are marketed toward, but not exclusive to, seniors and empty-nesters.

2016 saw the completion of the sixteen senior independent-living duplexes at *Sunset Village* on Sylvania-Metamora Road, and the completion of *The Lakes of Sylvania* assisted living facility on Mitchaw Road. This facility will also be developing fifteen independent-living duplexes on its campus. Additional developments in senior-related facilities saw the approval of an addition to the *Genesis HealthCare Sylvania Center* on Whiteford Road to operate a dialysis center, and the approval of a new 122 unit senior-living apartment building on King Road, just north of Sylvania Avenue, to begin construction in early 2017.

COMMERCIAL/LIGHT INDUSTRIAL: In addition to residential development, the Township also saw continued commercial & light industrial construction, much of it concentrated along Central Avenue. Some of the new projects opened, constructed or approved in 2016 include;

- *Fresh Thyme Farmer's Market*– 5115 Monroe Street
- A new *Yark BMW* dealership at 7600 Central Avenue just west of King Road
- *AAA Tire & Auto Service* – 3201 Meijer Drive, in front of the Meijer Store
- *Chick-fil-A* fast-food restaurant - 6636 Central Avenue, at Zone Avenue (former Walgreens site)
- *Meyers Auto Wash* – 3119 Central Park West, at Central Avenue
- *Starbucks* and *European Wax* – both at 5235 Monroe Street in front of Target
- *Buffalo Wild Wings* – 6710 Central Avenue
- *Midwest Security Products* – 3840 Herr Road
- *Lock-It-Up Self- Storage* – 7950 Sylvania Avenue
- *S & G In and Out Mart* – 5101 Alexis Road
- 3130 Central Park West – Office Building addition

STZR AMENDMENTS: The office submitted two amendments to the Sylvania Township Zoning Resolution (STZR) which were both approved by the Trustees in 2016. An amendment to *Article 25 Conditional Use* now requires that an application for a conditional use permit be first reviewed by the Lucas County Plan Commission prior to being heard by the BZA. The reason is primarily to allow for a different perspective on something which could have a large effect on an area of the township before making a final decision. Conditional Use requests for a Home Occupation are exempt from this new requirement.

The second amendment to the STZR approved in 2016 was to *Article 31 Signs and Advertisement*. This amendment modified the regulations regarding monument signs in order to encourage their use in the Township in lieu of pole signs, allow greater flexibility in sign design and features, and to be consistent with monument sign regulations of neighboring communities.

Additionally, the Trustees rescinded the previous sidewalk requirement from 1998 and approved a new sidewalk resolution that addresses the requirement for pedestrian access for all new developments and redevelopments in the Township.

UPDATE LAND USE PLAN: After many meetings and interviewing several qualified firms, Sylvania Township has contracted with Reveille, planning consultants out of Bowling Green, and begun the process of updating the Township's Land Use Plan. This important document serves as a guide for future development decisions in the Township and is typically updated every five-to-ten years. The last update was in 2007. The Township expects to have a final draft by the end of 2017. A community survey eliciting the public's outlook on the Township and their expectations for its future growth is on the Township's website and Facebook page and will run until November 2017.

PERSONNEL: The department saw some staff changes in 2016. The Assistant Zoning Inspector, Val Leutz retired at the end of June after working for the Township for twelve years. Marie Truckor is our new part time Zoning Clerk. Marie staffs the front desk and addresses inquiries from the public and processes all of our zoning permits and applications. The Township also hired a part-time Zoning Compliance Officer last summer to increase enforcement. Dean Boyers, a former Township firefighter, responds to zoning complaints and addresses violations of the Township's zoning resolution.

Road & Service Department

IMPROVEMENTS: The work of the road department never comes to an end. In 2016 .91 miles of new roads and infrastructure were added to the system, for a total of just over 131 miles of Township Roads. The maintenance efforts this year consisted of 2.96 miles of resurfacing, 1.15 miles of Micro Surfacing, 9.07 miles of crack sealing and 25 locations for asphalt repairs. Other infrastructure improvements included 196 catch basin replacements or repairs, 537.5 linear ft. of curb, 1079 sq. ft. of sidewalk and concrete road, and 1586 linear ft. of storm sewer upgrades. Those are the major works accomplished by the department which also provided great service to township residents keeping roads plowed and salted during the winter.

MAINTENANCE: In addition to Township roads, there are 30 miles of county and 10 miles of state roads that lay within the Township that, the department is responsible for providing residents, spring and fall brush and leaf pickup, and the annual household goods collection. The department is also responsible for other maintenance activities, such as repair or replacement of damaged street signs, roadside mowing, ditch cleaning, street sweeping and tree trimming and removal.

GRANTS: The Township received a Safety Sign grant for \$14, 244.96 that will purchase new regulatory signs such STOP and speed limit signs that will be installed over the next two years.

EQUIPMENT SERVICE: The department's mechanics deal with all of the township vehicles and equipment, keeping them in top running order. They regularly attend seminars and workshops to stay on top of the best practices. All mechanics have Automotive Service Excellence (ASE) certifications. Two are Master ASE Certified and 1 holds a Master Certification as an Emergency Vehicle Technician.

PERSONNEL: In 2000, the department had 22 employees, while there are 14 today. The strategic use of private contractors and extensive training of employees to improve skills has made a more efficient workforce.

Police Department

Similar to the fire department, the police department is very noticeable to the public as officers patrol the community and respond to emergencies. But they are also involved in numerous proactive, community oriented activities that don't always get noticed, but are regularly performed to enhance the safety and security within our community, and enhance the quality of life for all those who live, work, and visit Sylvania Township.

The township police department's DARE program graduated 344 students in 2016 from the four elementary schools located in Sylvania Township. The "Safety Township" program, conducted in June, graduated 93 children.

The township police continued to provide proactive services in 2016 such as house checks to our residents while they were away from home for extended periods. We also assisted citizens in our community who have locked themselves out of their vehicles or homes. No call for assistance or police service is too small for the police department as it strives to provide the best police service possible to enhance the safety and security and, ultimately, the quality of life in the community.

Total patrol miles for Township, County & State roads total about 170 miles. Overall crime for Sylvania Township was down for 2016 [see Appendix] except for assaults, which were up in 2016.

PERSONNEL: The Sylvania Township Police Department lost two recently hired police officers in 2016. Each of these officers chose to follow a totally different career path. The department hired a new emergency services dispatcher in 2016 to replace one that left and promoted Detective Jim Rettig to Deputy Chief. Overall, the police department has maintained very good retention of its personnel.

The Sylvania Township Police Department strives to be good stewards of the revenue received through police levies. The Department has not sought additional revenue since 2004. In 2016, the police department was able to stay well within budget, spending about 91% of the allocated police budget.

EQUIPMENT: The police department only needed to purchase one Sport Utility Vehicle (SUV) for patrol operations in 2016, based on the mileage of the current vehicles in the patrol fleet. The Department also purchased a large cargo van style vehicle that will be extensively modified to be utilized for the Special Response Team (SRT). Through having our experienced talented township mechanics modify this vehicle, as opposed to purchasing a readymade customized vehicle, the police department was able to save many thousands of dollars.

CO-OPERATION: The department continued its cooperative agreement with the Sylvania City Police Division by conducting a transport service for their prisoners between the Lucas County jail and the Sylvania Municipal Court. In the past, each department transported its own prisoners, but since the Sylvania Township Police Department has a large transport van that is specifically designed to transport a larger number of prisoners it benefits both departments for the Township Police Department to conduct these transports under a contract with the city police department.

The Sylvania Township and Sylvania City police departments also collaborate in their joint operation of the Sylvania Metropolitan Special Response Team (SMSRT) which could also be defined as a SWAT team for the entire Sylvania community. This team includes seven officers from the township and five from the city police departments. This unit conducts extensive training to effectively respond to dangerous situations involving subject(s) who pose an imminent threat to themselves and/or others. The pooling of resources from both police departments significantly reduces the cost of the operation of such a team.

SAFETY SERVICE CALLS: The Sylvania Township Dispatch center received just over 73,000 incoming calls for all safety services in 2016, which resulted in nearly 14,146 calls for police service.

Fire Department

The Sylvania Township Fire Department is administered by the Trustees of Sylvania Township. The Fire Department services both Sylvania Township and Sylvania City with an area of 28.6 sq. miles and a population of nearly 50,000 residents. The department has an administrative staff of six [1- Fire Chief, 2- Deputy Chiefs, 2-Administrative assistants, 1- Training Captain] and 58 career and 5 part-time firefighter paramedics working 24 hour shifts from 4-fire stations located throughout the City and Township. The Department strives to provide the best in professional emergency services from our highly skilled firefighter - paramedics. The team provides the residents and visitors to our Sylvania community the best in

fire protection, advanced life support emergency medical services, fire prevention community risk reduction and public education services.

EQUIPMENT: The Fire Department experienced many challenges in 2016. A transport unit was placed in-service on January 21st 2016 and is staffed with on duty personnel. The unit supplements the private sector ambulances with a goal to limit the time City & Township residents have to wait for an ambulance transport to the Hospital. The Ambulance transported 359 of our residents to medical facilities and due to our soft billing program (we only accept what the insurance company pays) our residents had no out of pocket expenses. The over 20 minute wait time for our residents was reduced by 80%.

The Trustees approved a resolution in early 2016 to replace one of our older Fire Engines that was reaching its life expectancy. A contract with Sutphen Corp. was executed and a new Engine was delivered in December of 2016 at a cost of \$517,013.52. This Engine will be placed at our #1 Station located at 6633 Monroe St. in the City and should remain in front line service for 10-12 years with reserve status for 13-15 years.

COMMUNITY EVENTS: The department sponsored its fourth annual Safety Fair in October at fire Station #4 headquarters on Sylvania Avenue. Attendance continues to grow every year and again this year the fair opened one hour early to allow children with special needs to attend, without any crowds. The theme this year was to demonstrate the importance of having working smoke detectors in your home. The Fire Department continues its return to the scene program which consists of going into a neighborhood shortly after a house fire has occurred and asking residents if they have a working smoke alarm. If the resident needs an alarm or battery the Fire Department staff installs one at no charge to the resident. 47 smoke alarms were installed in 2016.

The Department continues to participate in many community events and committees. Chief Kowalski was chosen to be part of the Fire and EMS Command Staff for the 2016 Toledo Express Air show. The department also sent our Medical golf cart with two Paramedics as part of the EMS and medical stand-by for the 2-day event. The Department also participated in the annual Sylvania Business Expo, the Senior Health Fair, Marathon Golf Classic, all city sponsored parades, Main street events and taught a free hands only CPR class at the Senior Center. The Chief is past president of the Sylvania Community Action Team (SCAT) which is the volunteer drug and alcohol prevention group for the community.

The Fire Department was honored to be asked to participate in Toledo Memorial Parks dedication of a 9-1-1 memorial. Fire crews escorted a piece of steel from the World Trade Center towers from downtown Toledo to Toledo Memorial park where it was placed on the 9-1-1 Safety Forces Memorial.

GRANTS & TRAINING: Last year the Fire Department applied for a 1.2 million regional radio grant. The grant was written in conjunction with five other Fire Departments. Sylvania Township was the lead department that wrote the grant and would be the administrator of the funds. The Department also applied for a \$425,000.00 grant for SCBA (self-contained breathing apparatus) as our current units are reaching their life expectancy. Both grants made it to the final selection process but unfortunately they were denied. With some minor changes made to the grant proposals, we have applied for both grants again this year. During 2016 employees accumulated just over 54,124 hours of Fire and EMS training. The training consisted of organized training sessions both on and off duty as well as completing assigned training programs through the department's on-line computer programs. The administrative assistants at headquarters also participated in a 5 day training class and were certified as car seat installers. Many requests over the last several years have been voiced for this service and we are

now proud to offer this service to City & Township residents.

ISO: The Fire Department underwent a Public Protection Classification survey by ISO in 2016. We just received our results and the Fire Department has increased its rating from a class 4/9 to a class 2/2x Fire Department. This is an enormous accomplishment for the Department and a potential cost savings in insurance rates for our community. Although we have a few things to work on, the report reaffirms that we have a good solid Fire Department that is well trained, motivated and equipped.

Lastly, after 39 years of service to our community, Chief Kowalski will be retiring March 16th of 2017. Over the years this job has afforded him the ability to attend many educational classes, obtain multiple certifications, college credits and to serve on numerous committees. In doing so he has been afforded the ability to make him a better educated and prepared Firefighter Paramedic to serve the community. He thanks the citizens of Sylvania, the Trustees, staff and employees for the honor and privilege of serving this community for so many years. It has indeed been a pleasure and he will miss it.
