

Bids for Road Projects

Bids will be opened June 11 for several projects scheduled this year by the Sylvania Township road department. Streets to be resurfaced and scheduled for August are Gradwohl Road between Bancroft St. and Holstein Road, Central Park West, Sunbreeze Trail, Porsha Dr., and Theresa Trail, and High Oaks, and North Oak and South Oak courts. Total cost for those projects is estimated at \$800,000, with about 45 percent covered by state grants. Other streets scheduled to be resurfaced in August are Sylvan Green, Fairway Lane, Miakonda Trail, Towpath Lane, Princess and White Birch. Cost of those projects is estimated at about \$160,000, and will be paid for through the township road and bridge fund.

In addition to resurfacing work, the township will implement several drainage projects. The Hasty Road Culvert replacement project is scheduled for this summer. Three culverts will be replaced on Hasty Road near Central Avenue. Hasty Road will be closed during the daytime with detours posted. Although the total cost has not yet been determined, the project will be paid by the Lucas County Storm Utility District Fund.

Township crews will also be working on log jam removals from Ten Mile Creek near Herr Road. Work will be performed by township crews. Storm sewer replacement projects are also scheduled from August to October: Calvin, Janet, and Estess avenues. Intermittent, temporary road closures are expected during the daytime. The cost is estimated at about \$263,000 and will be paid by Lucas County Storm Utility District Fund.
